

AP1000 Payment Kiosk

AP1000 is a complete Automated Payment Kiosk which securely handles cash payments, including coins and bank notes. It is intended for applications in retail payment and integrates industry leading coin and note recyclers for high-speed payment automation.

AP1000 is designed for small to medium volume transactions and is an ideal solution for smaller retail locations such as pharmacies, bakeries and hospitality.

AP1000 can be easily integrated with any POS system but equally can be operated as a standalone payment station.

AP1000 is part of a full range of automated payment products from ePOINT, designed to simplify cash handling in the retail environment.

Best in class coin recycling reduces the requirement for change

Product Features

- Dual and Quad banknote recycler options
- Fast, bulk coin pay-in and pay out
- Embedded user interface screen or UI via Tablet or mPOS device
- Easy to integrate with any POS system via transaction REST API
